## About Radiance

The Freeplay Radiance solar powered lantern provides bright light and mobile phone charging for people living off-grid.

A powerful 2 watt solar panel recharges the internal battery so that users are independent of commercial energy sources and can run the lantern without the cost of fuel or replacement batteries.

Radiance has 3 light settings and will provide light for up to 45 hours from a full charge. The practical design enables use inside and outside the home, on a table or hanging from a ceiling.

There is an integrated 85dB SOS alarm to support personal security in isolated or challenging environments.

Radiance has been built tough and is designed to be used in harsh conditions.
